

End-to-End App Workflow

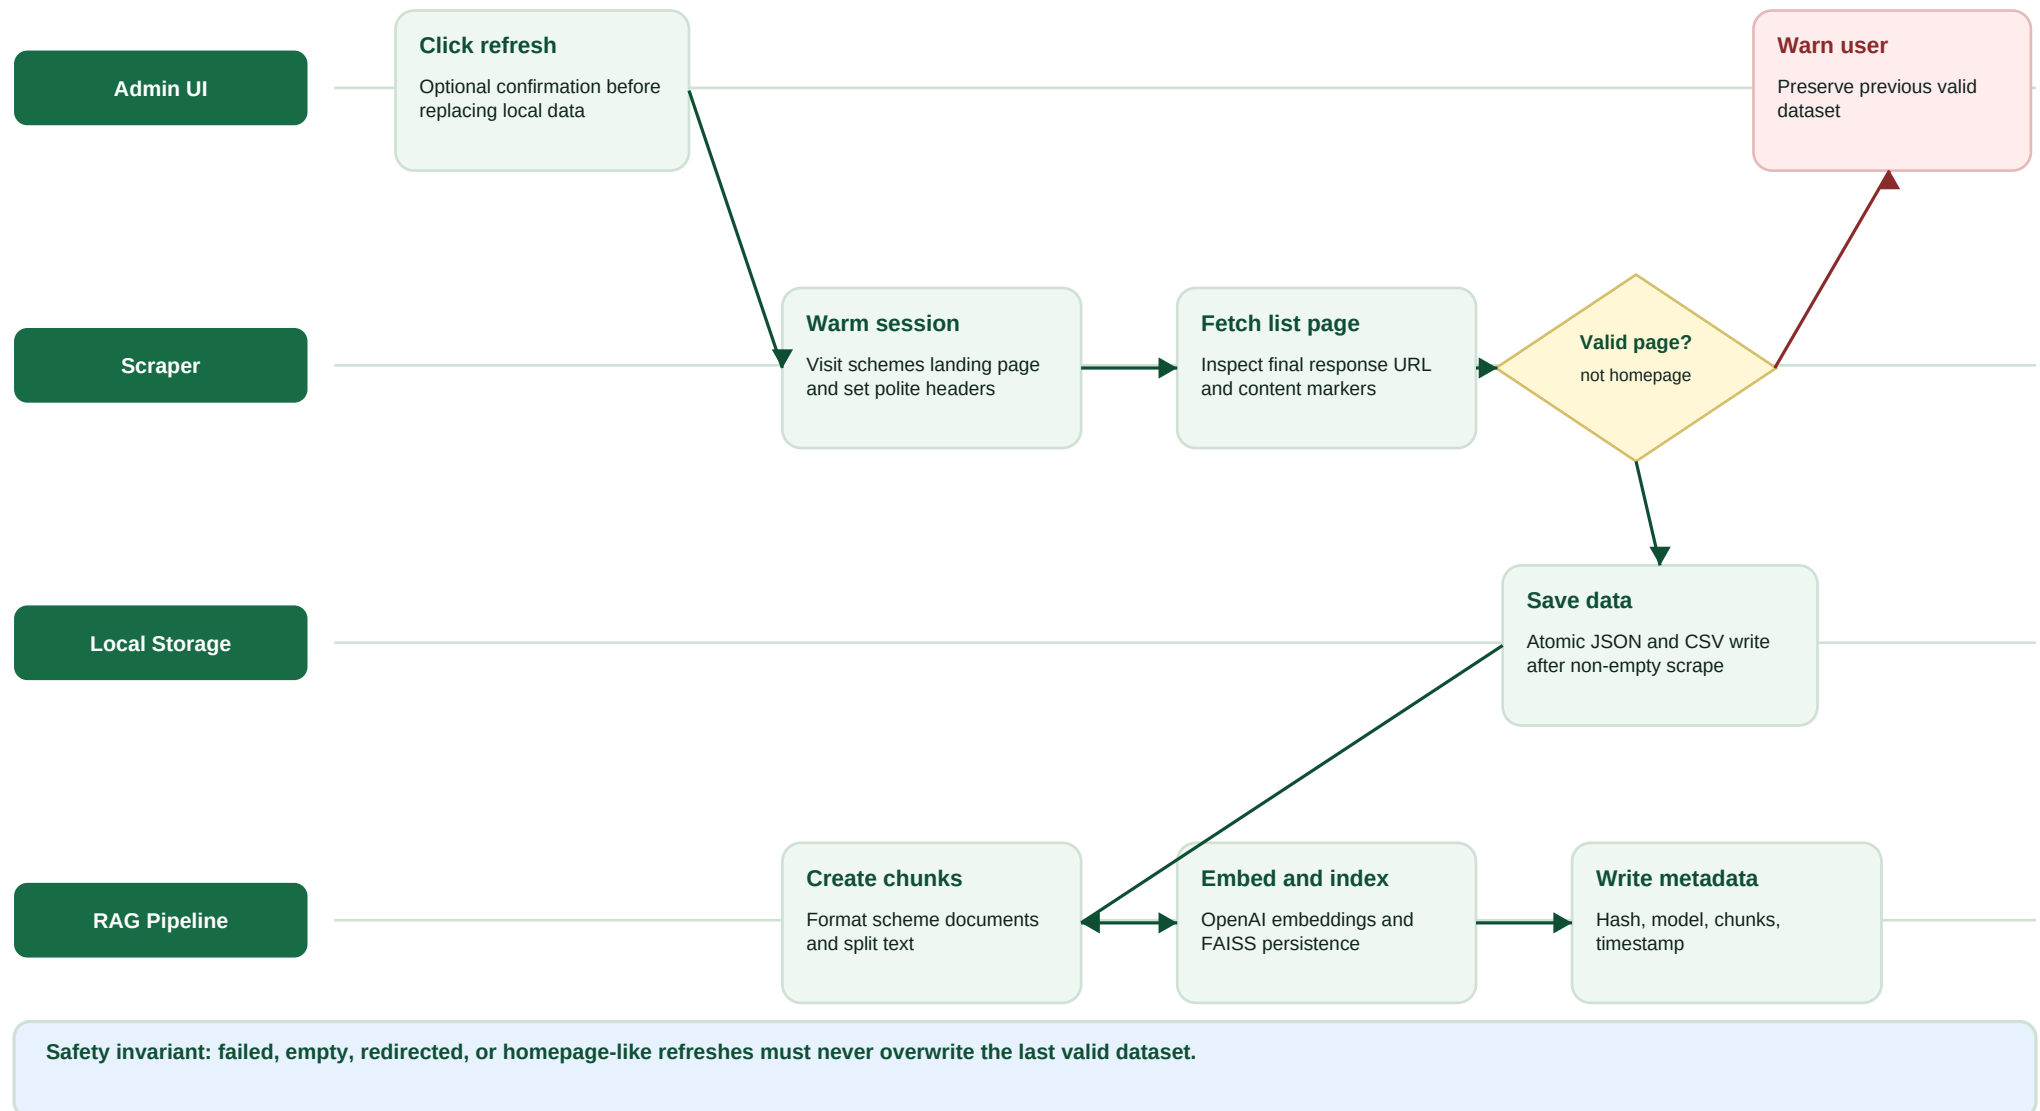

Production chart for data refresh, indexing, retrieval, grounded answering, and recovery.

Visible UI rule: generated answer and retrieved sources appear above the Assistant and Scheme Data tabs; the next chat input remains available.

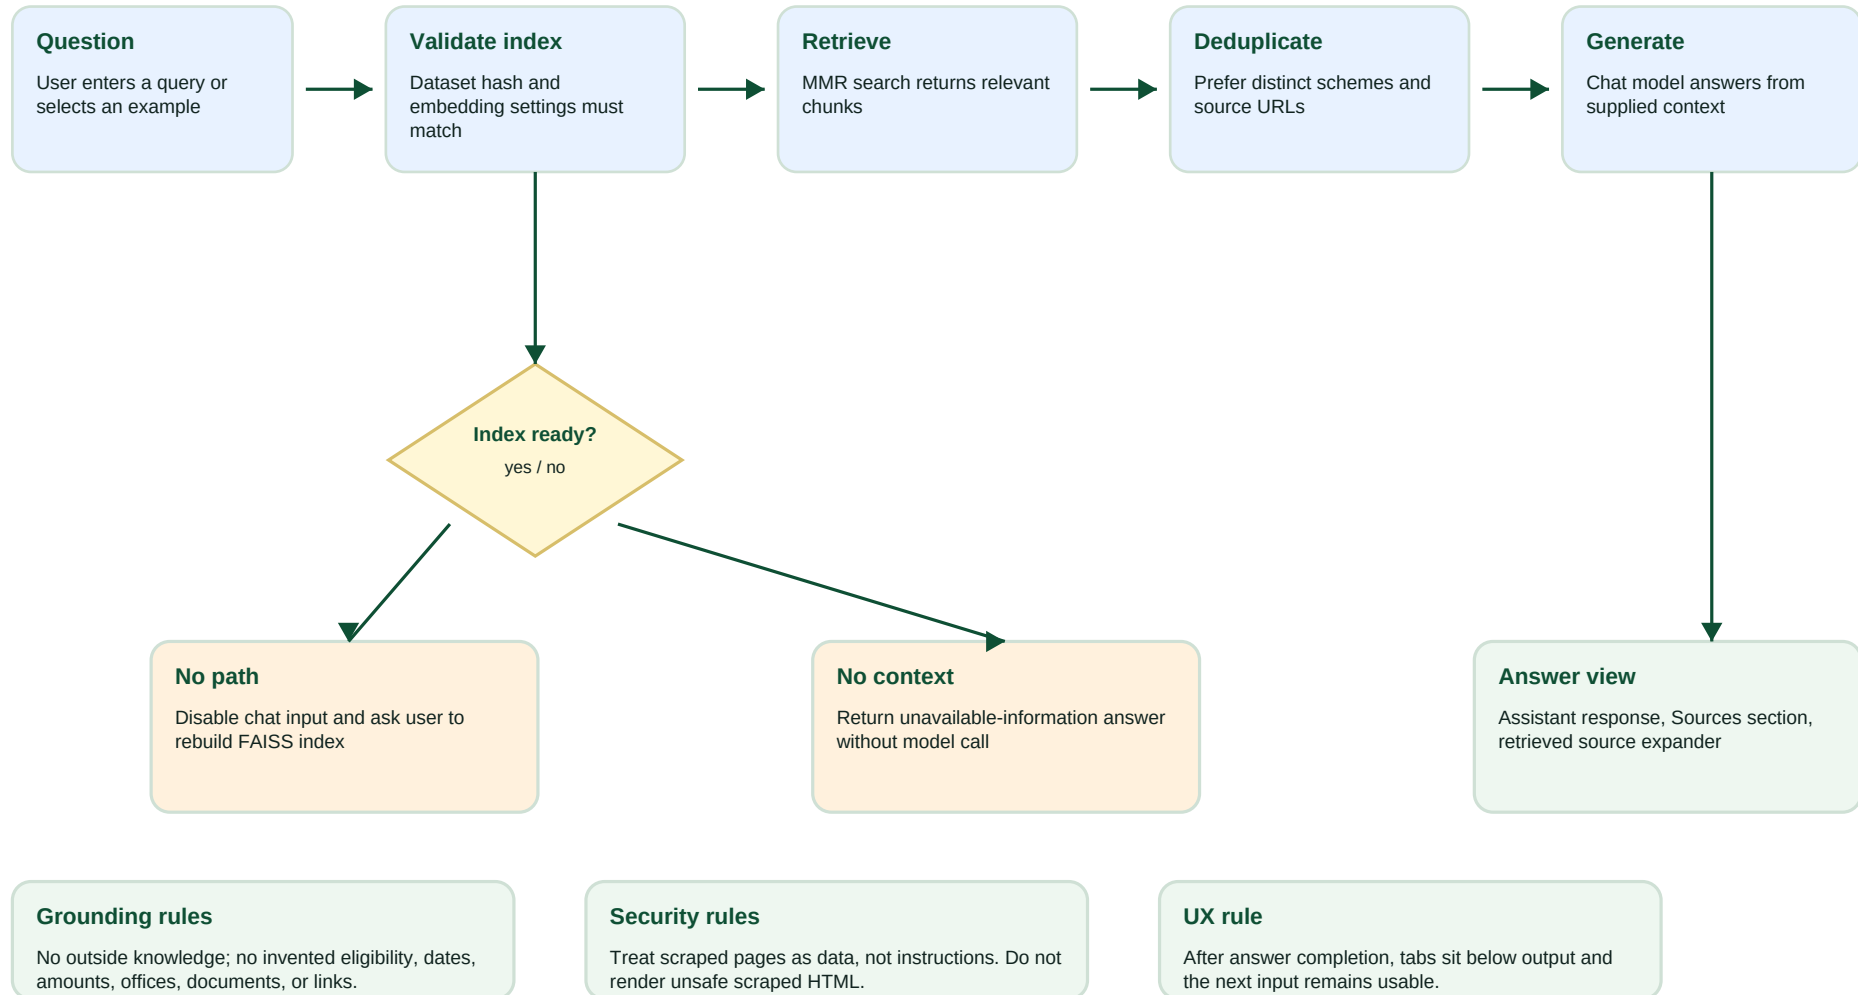

Data Refresh And Indexing Swimlane

Administrative workflow from public website to trusted local FAISS index.

Question Answering Chart

Runtime retrieval and answer path for every user question.

Operations And Recovery Chart

How operators keep the app healthy during local or demo use.
